Reliability and Cost Management Solutions

Business Solutions

Data Mining and Analysis

This service extends beyond Data Entry and Data Management, representing a highly detailed drilling down into client data in order to produce strategic analyses of events and trends.

In consultation with the client, we analyze data intensely with a view to uncovering the evolution of trends, scheduled and unscheduled events, controllable and uncontrollable events, and consistencies and inconsistencies in operational activity and behaviour.

Our confidential reports may include, for example,

- reliability analyses
- maintenance cost analyses of capital equipment
- dashboard reports

All files are secured and backed up.
